ದಿನಾಂಕ 29-12-14 ರಂದು ಸಿಹಿಸರಿರವರು ಅಣಿಗೆ ಹಾಡಬಾಗಿ ಶೊಪ್ ಗೆಲಿನ ಕಾರಾಂತವೆನ್ನೇದು.

I am Jansi Rani, Mother of Ms.Sangeetha Arjunan (ma. Nithya Turiyateetananda) aged about 24 years. She has been a practicing Volunteer taking Sannyas traing at nithyananda ashram since about 4 years.

I was reposed about her sudden death on 28 dec 2014 night. my family has a history of cardiac issues . My other daughter and sangeetha's sister had also suffered possible cardiac arrest.

So I have no doubt that Ms.Sangeetha also died a natural death due to my family history of cardiac problem.

I request due process to be done and no objection to be given for her body to be handed over to me I can take it to tamil nadu for her funeral.

29 Dec 2014

To,
Sub-Inspector of Police
Bidadi Police Station,
Bidadi

From,
Jansi Rani
mother of
Ms. Sangeetha
Arjunan,
s/o Nandal
Kuttappatty, Trich.

Sub:- Reporting the death of my
daughter Ms. sangeetha
Arjunan (ma Nithya
Tatyateetamanda)

Sir,

I am Jansi Rani, mother of
Ms. Sangeetha Arjunan (ma Nithya
Tatyateetamanda) aged about ~~24~~²⁴ years. She has been a ~~cowreecopy~~^{blody}
practicing volunteer taking ~~cowreecopy~~^{blody}
sanyas training at ~~Nithyaramanda~~^{ಅರ್ಥಕ ಉಜ್ಜ್ವಲ ವಿಜಯ ಮಹಾದೇವ ಮಂದಿರ}
ashram since about 4 years.

I was reported about her
sudden death on 2nd Dec 2014.

Post: 29/12/14 Date written: 01/01/15
Moral Opp. v/c No: 20/14 Cenc/VG
~~Witnessed by~~

My family has a history of cardiac issues. My other daughter and Sangeetha's sister had also suffered possible cardiac arrest.

So I have no doubt that Ms. Sangeetha also died a natural death due to my family history of cardiac problem.

I request due process to be done and no objection be given for her body to be handed over to me so I can take it to Tamil Nadu for her funeral.

Sincerely,

(Mr. Jani Ram)

3	Preservative used saturated solution of Sodium chloride	3

METHOD OF ANALYSIS

The article Nos.1 and 2 are the autopsied samples of Sangeetha (Female/24 yrs) and article no. 3 is the sample of preservative; Vide PMR No.22/2015 ; dated:07-01-2015.

SAMPLING

1. Finely minced tissue samples and preservative were subjected to steam distillation and the distillate was collected.
2. Finely minced tissue samples and preservative were subjected to liquid liquid extraction (LLE) with dichloromethane/diethyl ether/ethyl acetate at acidic, neutral and basic pH. After phase separation, the organic layer was purified, evaporated to dryness and reconstituted with methanol.
3. Finely minced tissue samples, and preservative were added with zinc granule and acidified. The resulting fumes were passed through SDDC-morpholine reagent.

ANALYSIS & IDENTIFICATION

1. Distillate from the sampling method 1 was analyzed for alcohols by Colour tests and Volumetric titration/Gas chromatography
2. Extract from the sampling method 2 was analyzed for Pesticides, Drugs and Alkaloids by Colour tests, Thin layer chromatography (TLC) and High performance thin layer chromatography (HPTLC)
3. Distillate from the sampling method 1 was analyzed for cyanide by Colour tests.
4. Filtrate from the sampling method 2 was analyzed for toxic metal ions and anions by Colour tests.
5. The reagent from the sampling method 3 was analyzed for phosphide ions by Colour tests and UV-Visible Spectrophotometry.

OPINION

Residues of Volatile poisons, Pesticides, Barbiturates, Benzodiazepine group of drugs, Toxic metal ions and anions were not detected in all the above stated articles.

VICTORIA HOSPITAL
BANGALORE MEDICAL COLLEGE & RESEARCH INSTITUTE
FORT, BANGALORE-560002

MLC NO: 73/15

NAME: Sangeetha

AGE: 24 yrs

SEX: Female

DATE OF RECEIPT: 9/04/2015.

DATE OF REPORT: 13/04/2015.

Received single packed and sealed slide box along with sample seal and a letter from Dr. Venkataraghava, Professor & H.O.D, Department of Forensic Medicine, Victoria Hospital, Bangalore, requesting to review the slides. The slide box contained 26 slides labeled A to Z.

HISTOPATHOLOGY REPORT

MICROSCOPY:

LUNGS: Seen in slides A & B

Section studied shows widened alveolar septae with congested capillaries and edema. One of the bronchi seen in the section B shows evidence of vegetable matter of ? significance within it. Rest of the bronchioles seen in both the sections appear within normal limits.

SPLLEN: Seen in slides C & D.

Section studied shows evidence of congestion.

LIVER: Seen in slides E & W.

Section studied shows dilated sinusoids and mild periportal mononuclear cell infiltrate. One of the slides (W) shows evidence of perivenular hepatocyte necrosis with normal looking periportal hepatocytes.

KIDNEY: Seen in slides F to K.

Section studied shows glomeruli within normal limits. Tubules shows partial autolytic changes. Rest of the parenchyma shows evidence of congestion.

BRAIN: Seen in slides L, M & N.

Section studied shows brain parenchyma appearing within normal limit.

HEART: As per the autopsy report issued by Department of Pathology, Rajarajeshwari Medical College & Hospital, Bangalore, the left ventricular wall thickness was noted as 2 cms with evidence of concentric left ventricular hypertrophy.

Section from left ventricle (slide P) and interventricular septum (slide Z) show focal disarray of fibres with evidence of fibrosis and few hypertrophied fibres.

Sections from left coronary artery (slide V), Right coronary artery (Slide X) shows evidence of atherosomatous changes with no critical narrowing of the lumen. Sections from left circumflex artery (Slide R) lumen appears patent. Section from coronary artery seen in slide Q shows atherosomatous changes with no significant changes in the lumen. Blood vessels seen in slides S & U appear within normal limits. Slide T shows one of the great vessel with evidence of atherosomatous changes.

Salient findings:

LUNG: One of the section shows evidence of vegetable matter within one of the bronchi of ? significance.

LIVER: Shows evidence of perivenular hepatocyte necrosis.

HEART: Shows evidence of left ventricular concentric hypertrophy on gross examination with microscopic evidence of focal hypertrophy of cardiac myocytes, interstitial fibrosis and disarray, probably due to
? Hypertensive heart disease.

? Cardiomyopathy.

Respected Sir,

I am residing at the above mentioned address. For last 4 years, my family has been devotee of Nithyananda ashram in Bidadi near Bangalore. In this ashram, my daughter Sangeetha has been serving as Brahmachari for the last 4 years. We also visited ashram often.

In this situation, on 28.12.2014 night my wife Jhansi got an urgent phone call from Nithyananda's ashram, they informed that "your daughter's health is not alright, come immediately". Since I was not well, I sent my wife Jhansi and friend Nayara immediately to Bidadi ashram. On the way, near Hosur the car was stopped and ashram residents Pranananda and others informed my wife that my daughter Sangeetha has died of heart attack and then took them to Bangalore Rajarajeshwari Hospital. There they told my wife Jhansi that if she wants to get our daughter's body she must sign few papers, both written and blank papers.

As my wife was in shock and grief she did not read or even see the papers, she simply signed the papers wherever they told her to sign. Then she got the body and returned home. Few ashram people also came along with Sangeetha's body. I was shocked on seeing her body, post-mortem had already been done. Ashram people stayed until the body was buried and left only after it was over.

My daughter Sangeetha was healthy only, she did not suffer from any health problems, she did not have any heart problems also. Sangeetha is only 24 years old. Therefore I have very strong doubt about my daughter's death. We want to know the real cause for the my daughter's death. Hence I request you to kindly investigate this death immediately. Since post-mortem was done in a hospital known to Nithyananda, I don't have trust in it.

Hence I request that the post mortem be conducted here once again and the truth be revealed to us. I request you to kindly take necessary action.

This was dictated by Praveen Pandian

Praveen

To:

Director General of Police, The ^{Deputy} Superintendent of Police
Karnataka State Police, Ramanagaram (B.T)
Bangalore, Karnataka - 560001

Respected Sir,

Subject: Appeal for immediate investigation into suspicious death of my 24 year old daughter Sangeetha in Nithyananda Swami's Bidadi Ashram on 28/12/2014

My 24-year-old daughter Sangeetha has died suddenly and very mysteriously in Nithyananda ashram on 28/12/2014. The Ashram and Hospital told me she died a natural death due to heart attack. But she was very healthy and did not have any history of heart problems or other problems. So I strongly suspect she did not die a natural death.

I fear that my daughter was tortured physically and mentally in the ashram. During the last one year we were not even allowed to meet her much and she was also not allowed to talk to us. There are so many girls living in the ashram, I consider all of them like my daughter. I don't want any other girl to die like my daughter. As a distressed and anguished mother, I appeal to your good heart and esteemed office to ensure that truthful and immediate investigation of this unnatural death is done and to kindly reveal to us the real reason why our 24 year old daughter Sangeetha has died in Nithyananda ashram.

BACKGROUND

For last 4 years, my family has been devotee of Swami Nithyananda, his ashram is in Bidadi near Bangalore. My daughter Sangeetha was very interested in spirituality, so she decided to take sanyas after completing her BCA degree about 4 years ago. Her name was changed in the ashram to Ma Nithya Turiyatitananda Swamini. For the past 4 years, my daughter Sangeetha was residing in Nithyananda's Bidadi ashram as a Brahmachari. We also visited the ashram many times.

In the ashram she was made the head of computer department, and there were more than 10 young girls working under her in that department, doing all ashram work. All the younger girls under her adored her. Whenever I visited the ashram they all told me Sangeetha is a wonderful person. We have great faith and respect for Nithyananda.

swami, so we trusted him completely. We trusted that our daughter is in a safe and good place and that Swami Nithyananda will take good care of her like a father and mother together.

TORTURE IN ASHRAM

Beatings:

Sometime around mid 2013, Sangeetha called one day from the ashram, and she told us to come to the ashram. So I went there the next day. After making me wait for several hours, they sent Sangeetha to meet me. She came crying and said she had been slapped. I was surprised and asked her who slapped her, she said Ranjitha slapped her in front of Nithyananda. I immediately decided to take her home. After reaching home, she showed me her legs, she had been beaten very badly below her waist & on her legs. I was shocked to see several bruises and injury marks. I decided that Sangeetha will not go back to the ashram anymore.

The very next day Hamsaananda, a brahmachari in the ashram, came from the ashram along with 3 other ashram residents. They told us that Sangeetha needs to return to the ashram immediately because she has taken sanyas. They claimed that before leaving the ashram she must renounce her sanyas & drop her kavi at Swami Nithyananda's feet, but she left without completing the formalities.

Intimidation:

Hamsaananda also threatened that he will file a police complaint against Sangeetha alleging that she stole a laptop and several pen drives from the ashram. She brought a laptop & several pen drives with her, but they were hers, she did not steal anything. We are not poor people and Sangeetha has no need to steal anything. During last 4 years, even though we offered to buy her laptop and mobiles, she refused and never wanted anything. She was never interested in such things.

Sangeetha told me that she had seen some incriminating photo/video of Swami Nithyananda on the laptop/pen drive. She also told me that she had seen Hamsaananda in a compromising position with another girl in the ashram. It is quite clear that the ashram was afraid she may reveal these things publicly. So as soon as Hamsaananda came home the next day, he immediately took the laptop and all the pen drives away, came back after few hours and returned only some of them to Sangeetha. He had deleted the contents of everything before returning them.

Because we respect Kavi, we trusted their words about formalities to renounce her brahmacharya. And also, we did not want any allegations of theft against my daughter. So I decided to take her back to ashram myself, make her complete all necessary the formalities and then bring her back home with a clean record. We left for the ashram along with the 4 ashram residents who had come. My sister also came with us to the ashram.

After we reached the ashram, my daughter, me and my sister were taken to meet Nithyananda. He was sitting on stage and Inner Awakening program was going on. He told me in a threatening way - "Do you know what horrible things your daughter has done? Shall I play the video right now in front of everyone here and show you?" He instructed a brahmachari in the hall - "Hey, play that video, play it, let everyone see it."

Swami Nithyananda claimed to have some video of Sangeetha just like the scandal video of Nithyananda which was shown on Sun TV. They recorded some normal videos of Sangeetha and must have managed to create some false video about my daughter. I was completely shocked when Nithyananda talked like this. I know for sure my daughter is not like that, we raised her to be a very good girl with very good moral values. So I said, "Okay play it." But my sister immediately said "No, no, please don't play it here." Then Nithyananda instructed ~~to take my signatures~~ to take my signatures in few papers and send us out. We left the hall but a short while later again Nithyananda called us back inside the hall.

Nithyananda was looking very different now, his body language had totally changed - he had folded his dhoti above his knees and was sitting on his seat very arrogantly like a rowdy. Only ashramites were sitting in the hall with 3 cameras recording everything. My daughter and sister were also there with me. For nearly 3 hours Swami Nithyananda was talking and making all kinds of allegations and complaints against Sangeetha. I literally cried and wanted to just leave from there.

At that time, Nithyananda himself admitted in front of everyone that the Laptop and pen drives had some photos of Nithyananda hugging and kissing Ranjitha. Nithyananda told Sangeetha, "What can you do with this laptop and pen drives? After all, I have already escaped and survived the video which came out earlier, what can you do with just this photo? You cannot do anything against me by using the laptop and pen drives", he said to us.

I did not want any blackmarks or false allegations against our innocent daughter. So finally I told Sangeetha to clear all these allegations against her and then came home with a clean record.

Another boy tortured in ashram:

One time, Hamsaananda had locked up all of Sangeetha's certificates in a cupboard and when she wanted to leave, he refused to return them to her. Another boy called Saravanan from Thanjavur tried to help sangeetha by breaking open the cupboard and getting the certificates for her. But just because he helped her, Hamsaananda and other ashramites punished him also. They beat him up badly and locked him up in a room for a few days. Finally his family and relatives went to Bidadi, got him released & took him away from ashram.

Isolating & Intimidating Sangeetha:

After I left Sangeetha in the ashram, I went 3 times within 2 month to see her and to tell her to come home, but they didn't let me meet her alone. I was only allowed to meet her along with other sanyasis in the ashram, and they kept telling me she has not finished her work, she can leave after finishing all the work assigned to her. The 3rd time when I went, they brought her to meet me, but she was in a terrible condition, she could not even walk a single step. I could not bear to watch the sight. Some 30 ashram people came with her, maybe they wanted to make sure she will not tell me anything. I could not stand there seeing her struggling to walk, so I left from there. I was crying all the way until I reached home. I kept thinking - "What they have done to my daughter? Why was she struggling to walk? Did we do the right thing by sending her back to the ashram." I was very disturbed and after about a week I went back to the ashram and told them I want to meet Swami.

From the time I reached in the morning till about 3 pm, they did not even let me enter past the ashram gates, I was made to wait outside the ashram almost the whole day. But in the meantime, they were preparing some papers by some lawyers, and making my daughter sign it saying that she will not leave the ashram. After that around 3 pm they made me sit in some room, and till 10 pm they made me wait there. I had not eaten anything whole day, not even a drop of water. Finally at 10 pm they took me to Kalabhairava statue near the entrance. I fear Kalabairava, I am a staunch believer of kalabairava & everyone in the ashram knows it. They told me promise on Kalabhairava that I or any of my relatives will not give any report against Swami Nithyananda to anyone. I promised. Finally they took me to meet Swami Nithyananda. He asked me whether I came to create anymore trouble? He told me to take my daughter and leave after all the problems are resolved. Until then she will have to stay in the ashram, Nithyananda told me. So I left her there and came back home, with the hope that I can bring her home soon.

But after that, they created wrong idea about me in my daughter's mind. One day they made my daughter call me & ask why I am spreading wrong things about Swami Nithyananda. I told her I am not saying any such things. But I heard others in the background telling her not to believe me and that I am talking against Swami Nithyananda. She said, if I continue to say wrong things about swami - they were telling her to say this - then she will file case against me! I said okay, go ahead file a case against me. Immediately after I said that, they cut the phone line. That was the last time I talked to Sangeetha. After that they did not even let me talk one word to her. I called Pranananda (person who coordinates the programs in ashrams) many times, but he never answered my calls. He would cut my call and send me message - 'I am in meeting'. Several times I called. But they never let her talk to me again. I don't know what they did to her after that. That was the last time I talked to her. After that they did not even let me see her.

MYSTERY DEATH

Phone call from Ashram:

We got a phone call from Nithyananda Ashram around 10 pm on 28th December 2014, they said my daughter Sangeetha fainted so they admitted her in ICU in the hospital. And we should come immediately. I left to Bangalore next morning on 29th; another devotee brought a car and took me there along with few others. On the way to Bangalore, they informed me that she died of heart attack, which was a shock to me. Then Pranananda and other ashramites took me to Hosur Dhyanaapeetam. After going there, they kept telling me again and again that Sangeetha died a natural death due to heart attack. I was stunned by this shocking news and I fainted. I became unconscious for sometime, I could not believe the news that Sangeetha was dead. I had hoped to take her home atleast now and take good care of her. There is no way she can die of heart attack. She was very healthy girl.

Signatures on Documents:

From Hosur Dhyanaapeetam, they took me to BGS hospital by evening on 29/12/2014. They told me Sangeetha's body was inside the ICU, but Pranananda did not allow me to go inside and see her body in the ICU. I could not stop crying and Pranananda told me to wait outside the ICU because I was crying too much and it will disturb patients in ICU. At that time, they took me to the parking area and showed me Sangeetha's body near an ambulance. I saw her face had turned almost black and there was some fluid coming from her nose and mouth, so I wiped it with my saree.

All I wanted was to take Sangeetha home. They did not allow us to take her home when she was alive. Atleast now, I wanted to take her body home and give her proper funeral. So I requested them not to do post mortem and Pranananda told me that because it is natural death, post mortem will not be done they will give us Sanpeetha's body.

Pranananda asked me whether we will cremate Sangeetha's body, I said no we will bury her. Immediately Pranandina called swami Nithyananda and told Swami about it. Then he told me that Swami says she must be buried in Bidadi ashram since she is a sanyasi. But I refused and said I will take her home. Immediately Pranananda called Swami Nithyananda again and then told me Swami wants us to bury her body in Tiruvannamalai Dhyanaapeetam ashram. But again I refused. The finally Pranananda called Nithyananda again and instructed that Swami says we can bury her body in the ashram land in Navaloor Kuttu-Pattu itself. But I firmly refused and no we will take her to our home and bury her in our place only.

Then Pranananda told me to sign some papers written in Kannada and English and also some blank papers. He said that I need to sign the papers, then only I can get my daughter's body. I cannot read Kannada or English. Also I was in a state of shock and

copy of G. Sari Devi
blue ink
date 05/01/2015
call 098452 942 109

I was not in any frame of mind to think clearly. So I signed all the papers wherever they told me to sign and told them to give me my daughter's body. They made me get into another ashram vehicle and took the body to Rajarajeshwari Hospital. They made me wait outside the Rajarajeshwari hospital for around than 2 hours. They told me that body has to be released by Rajarajeshwari hospital only. After that Sangeetha's body was shifted to a van and we left for Tiruchy. But Pranananda did not allow me to be with Sangeetha's body in the van, few ashram people only came in it. I was made to sit in another ashram car and we finally left Bangalore on 29th evening.

I would like to state that any documents or statements produced by the ashram, claiming to be signed by my daughter Sangeetha or by me must be disregarded. They were either signed under pressure from ashram or without knowledge/awareness of its contents, as they also made me sign blank papers while I was waiting in the Hospital in a daze.

Ashram people came with the body all the way till our home. Only after we came home I found out that they had already done post-mortem. It was a shock because ashram had promised that they will return the body to us without post mortem. Pranananda & other ashramites kept pressurizing us to complete the funeral immediately. They kept asking whether we will cremate her or bury her. They literally tortured me and left only after her burial was completed.

POLICE COMPLAINT

We have 100% doubt that this was NOT a natural death. There is no way she could have suffered a heart attack in the ashram. There is some other reason for her death. We want to know what is the real reason for my daughter's death. I don't know what they did to my daughter in the ashram, I believe she has been murdered because it is surely not a natural death.

So far I had not revealed all these things because I had promised on Lord Kalabairava that I will not say anything. Initially we were hesitating to give any complaint because there will be too much pressure on us from the ashram. Already we are in deep distress & anguish over this sudden mysterious death of our daughter, and we could not think of doing anything else. And already we have been getting phone calls continuously from the ashram for the past few days insisting that we should come to the ashram immediately.

After overcoming our initial shock & grief my husband complained immediately on 1/1/2015 to the local Ramji Nagar police station in Tiruchy district in Tamil Nadu. Kindly refer enclosures for a true copy of the complaint, CSR with CSR No. 1/2015 issued by the police and also English translation of the complaint. We were advised by Tamil Nadu police that the complaint will be transferred to Karnataka for further action. As my husband is unwell, he is unable to come here in person now, so I am making this appeal as a distressed and grieving mother.

*True copy
blunt
dated 01-01-2015
Sangeetha's mother*

Especially after news reports about our complaint to the police, Pranananda and others from the ashram have been calling me and my relatives and pressurizing us not to complain to police and insisting that it is natural death only. Ashram also sent some devotees who came to our house and kept telling us not to complain to police and trying to convince us that it is natural death only.

PRAYER

We just want to know what happened to our daughter, why did she die? We are 100% sure it is not a natural death. Therefore I humbly pray for the following:

- i. Exhum my daughter's body immediately and conduct fresh post-mortem in a neutral Government Hospital, which is free from Nithyananda Ashram's influence, so that we can know the truth behind her death. We do not trust the reports given by BGS Hospital or Rajarajeshwari Hospital as they are well known to Nithyananda Ashram and may be easily influenced by Nithyananda ashram.
- ii. A thorough investigation into my daughter's sudden and mysterious death in the ashram.
- iii. Kindly investigate and take necessary action, without any delay.

We trust that Karnataka police will do truthful and thorough investigation in this matter. I sincerely request that the real reason for my daughter's death should be investigated without any delay, and those responsible for it must be punished. I have stated whatever I can remember at this time, if any other information comes to my knowledge or memory I shall provide it during the course of investigations.

There are so many girls in the ashram, I consider all of them to be like my daughter. I don't want any other girl to die like my daughter. So I humbly pray that in the interest of justice and in the interest of lives of so many women and children living in Nithyananda ashram, this matter should be looked into expeditiously.

Thanking you,

This petition has been read over in English and translated in Tamil to me by Shri. R. M. Lenin Pandian, I understood and accepted the contents.

Ref: Your letter No. NO/RSD/CE/01/2015 dated 05-Jan-2015

CERTIFICATE OF EXAMINATION

The Articles sent in UDR No. 0040/2014 of Bidadi PS, U/S CODE OF CRIMINAL PROCEDURE, 1973 U/s 174, were received in the Laboratory for examination on 05-Jan-2015 through RAJU T K 415- PC. The seals found on the article/s were intact and tallied with sample seal. The description found on the article/s correspond to that of those present in the invoice.

MATERIALS EXAMINED

SL.No.	Description of Article/s	IO Marking
1	Portion of Stomach, small intestine and their contents	1
2	Portion of Liver & Kidney	2
3	Blood	3
4	Preservative used: Saturated solution of sodium chloride	4

METHOD OF ANALYSIS

Article Nos. 1, 2 and 3 are the autopsy samples of Sangoetha (Female / 24 years) and article No. 4 is the sample of preservative; vice PMR No. 568/14 dated 29/12/2014.

All the articles are sealed with seal impression as "RRMC&HFM".
The seals on all the articles are intact and tallied with the sample seal.

SAMPLING

1. Finely minced tissue samples, blood sample and preservative were subjected to steam distillation and the distillate was collected.
2. Finely minced tissue samples, blood sample and preservative were subjected to liquid-liquid extraction (LLE) with dichloromethane/diethyl ether/ethyl acetate at acidic, neutral and basic pH. After phase separation, the organic layer was purified, evaporated to dryness and reconstituted with methanol.

3. Finely minced tissue samples, blood sample and preservative were added with zinc granule and acidified. The resulting fumes were passed through SDDC-morpholine reagent.

4. Finely minced tissue samples, blood sample and preservative were subjected to wet digestion/protein precipitation and filtered.

ANALYSIS & IDENTIFICATION

1. Distillate from the sampling method 1 was analyzed for alcohols by colour tests.
2. Extract from the sampling method 2 was analyzed for pesticides, drugs and alkaloids by colour and thin-layer chromatography (TLC).
3. Distillate from the sampling method 1 was analyzed for cyanide by colour tests.
4. Filtrate from the sampling method 4 was analyzed for toxic metal ions and anions by colour test
5. The reagent from the sampling method 3 was analyzed for phosphide ions by colour tests and UV-Visible spectrophotometry.

OPINION

Residues of Volatile poisons, Pesticides, Barbiturates, Benzodiazepine group of drugs, Toxic metal ions and anions were not detected in all the above stated exhibits.

The following are the brief facts of the case

- 1) The Postmortem was conducted at the request of PSL, Bidadi PS UDR no 4014 on 20/10/2015 at Rajarajeshwari Medical College & Hospital on the dead body of Sangeetha, female aged about 24 years.

PM findings: Three abrasions 0.1cmx0.1cm noted on front of chest on midline, three in number - Antemortem and fresh in nature at the time of death -
 - Both lungs were pale and oedematous with consolidation in lower lobe of right lung -
 - No evidence of internal injuries -
 - Blood and viscera sent to FSL for Chemical analysis -
 - Organs sent for histopathological examination

Opinion to the cause of death was reserved pending for want of Histopathology & Chemical analysis report.

- 2) Histopathology report from Dept of Pathology Rajarajeshwari Medical College & Hospital -

Salient findings:

1) Diffuse Congestion of Organs

2) Left Ventricular hypertrophy

3) Evidence of old microscopic infarcts with ^{old}
in left ventricular wall. ^(Face of)

blood
edema
oedema
oedema

3) Forensic Science Laboratory report
NO FSL/TS/25/2015 dated 20/2/15

OPINION: Residues of volatile poisons, Pesticides, Barbiturates, Benzodiazepine group of drugs, Toxic metal ions and anions were not detected in all the above stated articles.

4) Postmortem Certificate NO 22/15 dated 7/1/15 from K.A.P.V.G Medical College, Trichyappalli

PM findings: Three dark brown abrasions 0.2x0.1cm noted on upper part of abdomen below chest. No other external or internal ante mortem injuries noted anywhere on the body.

• Skin bits, pieces of liver and lungs preserved for Histopathology examination. Vacera preserved for chemical analysis.

5) Forensic Science Laboratory Report

FSL/TS/71/2015 dated 11/3/15

OPINION: Residues of volatile poisons, Pesticides, Barbiturates, Benzodiazepine group of drugs, Toxic metal ions and anions were not detected in all the above stated articles.

Autopsy

Jaswinder Singh
EDD 2013 2015
MBBS 2013 2015
Diploma 2012 2015

6) Final Opinion Report from K.A.P.V.G Medical College, Tiruchirappalli dated 25.3.15

As the body was already autopsied, vital organ removed from the body while first postmortem, body was in the decomposed state, negative chemical analysis report and absence of fatal injuries during our postmortem examination, no definite opinion could be given for cause of death.

7) Further Opinion from Raja Rajeshwari Medical College & Hospital, dated 23/3/15.

Opinion as to cause of death:

On perusal of investigative information, post mortem findings, FSL report and histopathology report, cause of death is due to 'circulatory failure due to Myocardial infarction' (Natural Death).

8) Histopathology report from Dept of Pathology VICTORIA HOSPITAL BMCRI MLC no 73/15.

Salient findings

Lung: One of the section shows evidence of vegetable matter within one of the bronchi of significance.

negative

Jaunay

003 003 2003
000 000 000
000 000 000 100

Liver: Shows evidence of perivenular hepatocyte necrosis.

Heart: Shows evidence of left ventricular concentric hypertrophy on gross examination with microscopic evidence of focal hypertrophy of cardiac myocytes, interstitial fibrosis and diarrhoea, probably due to ? Hypertensive heart disease, ? Cardiomyopathy.

OPINION: ON PERUSAL OF ALL THE ABOVE REPORTS I AM OF THE OPINION THAT
"DEATH IS CONSISTENT WITH HEART DISEASE".
